

Publication title: Planning Policy Guidance 2: Green belts

Date published: January 1995 (Amended March 2001)

ISBN: 0 11 753037 9

Price: £8 (available to view below)

Summary

Planning Policy Guidance 2 (PPG2) outlines the history and extent of Green Belts and explains their purposes. It describes how Green Belts are designated and their land safeguarded. Green Belt land-use objectives are outlined and the presumption against inappropriate development is set out.

Contents

Foreword

1. Introduction

2. Designation Of Green Belts

3. Control Over Development

4. Cancellation Of Advice

Annex A

Annex B

Annex C

Annex D

Annex E

Foreword

Planning Policy Guidance notes (PPGs) set out the Government's policies on different aspects of planning. Local planning authorities must take their content into account in preparing their development plans. The guidance may also be material to decisions on individual planning applications and appeals.

This PPG replaces the 1988 version of PPG2, and advice in Circulars. It:

- states the general intentions of Green Belt policy, including its contribution to sustainable development objectives;
- reaffirms the specific purposes of including land in Green Belts, with slight modifications;
- gives policy a more positive thrust by specifying for the first time objectives for the use of land in Green Belts;
- confirms that Green Belts must be protected as far as can be seen ahead, advises on defining boundaries and on safeguarding land for longer-term development needs; and
- maintains the presumption against inappropriate development within Green Belts and refines the categories of appropriate development, including making provision for the future of major existing developed sites and revising policy on the re-use of buildings.

1. Introduction

1.1 The Government attaches great importance to Green Belts, which have been an essential element of planning policy for some four decades. The purposes of Green Belt policy and the related development control policies set out in 1955 remain valid today with remarkably little alteration.

History

1.2 The first official proposal "to provide a reserve supply of public open spaces and of recreational areas and to establish a green belt or girdle of open space" was made by the Greater London Regional Planning Committee in 1935. New provisions for compensation in the 1947 Town and Country Planning Act allowed local authorities to incorporate green belt proposals in their first development plans. The codification of Green Belt policy and its extension to areas other than London came in 1955 with an historic circular inviting local planning authorities to consider the establishment of Green Belts.

Extent

1.3 The Green Belts approved through structure plans now cover approximately 1,556,000 hectares, about 12 per cent of England. There are 14 separate Green Belts, varying in size from 486,000 hectares around London to just 700 hectares at Burton-on-Trent. "The general extent and location of the designated areas are given in the table and map opposite."

Intentions of policy

1.4 The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the most important attribute of Green Belts is their openness. Green Belts can shape patterns of urban development at sub-regional and regional scale, and help to ensure that development occurs in locations allocated in development plans. They help to protect the countryside, be it in agricultural, forestry or other use. They can assist in moving towards more sustainable patterns of urban development (see paragraph 2.10).

Purposes of including land in Green Belts

1.5 There are five purposes of including land in Green Belts:

- to check the unrestricted sprawl of large built-up areas;
- to prevent neighbouring towns from merging into one another;
- to assist in safeguarding the countryside from encroachment;
- to preserve the setting and special character of historic towns; and
- to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

The use of land in Green Belts

1.6 Once Green Belts have been defined, the use of land in them has a positive role to play in fulfilling the following objectives:

- to provide opportunities for access to the open countryside for the urban

population;

- to provide opportunities for outdoor sport and outdoor recreation near urban areas;
- to retain attractive landscapes, and enhance landscapes, near to where people live;

- * →
- to improve damaged and derelict land around towns;
 - to secure nature conservation interest; and
 - to retain land in agricultural, forestry and related uses.

* The way Constant has left land/yard next to Five Aves Farm (Jlm Ox) goes against this policy.
